Full Stack Software Developer

I'm a Full Stack Software Developer with 7 years of experience building web, desktop, and mobile applications across diverse industries including construction, logistics, and content creation. Proven ability to deliver end-to-end solutions for international clients in New Zealand, Sweden, and the United States. Skilled in modern development practices as well as contributing to legacy projects with expertise in Java, C# .NET, HTML, CSS, JavaScript, Vue, React, Laravel, Node.js, and cross-platform mobile development such as Flutter.

WORK EXPERIENCE

Miller Development Solutions

06/2021 - Present

Software Developer

- Contributed to LOQ web app, a secure messaging application similar to Skype using Vue and GraphQL. Was assigned on customizing base components and implementing the announcements module/feature.
- Delivered and currently maintaining VBKOD or L2000, a warehouse custom Logistics System (desktop and mobile) for DSV Sweden's transport operations using C#.NET
- Built and maintained new and existing microservices in the legacy project along with the Windows forms, Web API's, and the Handheld app.

Freelancing

01/2019 - Present

Freelance Software Developer

- Delivered custom software solutions for clients across multiple countries. From simple landing page designing tasks down to sophisticated financial apps or game modifiers.
- Projects ranged from web development to game modifications
- Created and shipped a custom Minecraft MOD to a US YouTube content creator company for seamless experience turning Minecraft to a more quest oriented experience along with adding magic spells and abilities upon leveling. Technologies used: Java
- Contributed to EarnBooks on developing the assigned Payroll feature/module on a financial/book-keeping Web app. Composed of dashboard, employees, time-management, leave-management, audits, payruns and settings. Technologies used: React, Tanstack, ShadCn, Laravel

Ultimate Builders Support Systems Inc.

07/2019 - 06/2021

Software Developer

- Developed GraphiQS, a graphics measurement application for construction plan analysis, enabling accurate PDF scaling and materials calculation for a New Zealand construction company. Used for scaling, measuring, stamping to be then adding set of materials needed based on the draft construction plan.
- Built PlanEditorApp, a mini version of GraphiQS its web-based measurement and annotation tool for construction plans. Used to measure and calculate needed materials for a construction, then exported to a CSV file or passing data to the existing web app Rest API.
- Developed and maintained software solutions for construction and building support systems
- Worked on full-stack development projects using Java and SQL
- Rewritten a heavy C# project to a more scalable and maintainable measurement app.

Aestus Software Solutions

10/2018 - 01/2019

Software Developer Intern

- Completed 3-month internship focusing on software development fundamentals
- Gained hands-on experience in professional software development workflows
- Learned and implemented basic Web development for starters along with introduction to Laravel on early stages.

EDUCATION

Bachelor of Science in Information Technology

AMA Computer College

Dumaguete City • 01/2015 - 01/2019

PROJECTS

GraphiQS

Construction Plan measurement & materials calculation/inventory app (New Zealand). Technologies: JavaSE, JavaFX, CSS, SQL

LOQ - Secure messaging app

Enterprise messaging platform. Technologies: VueJS, Typescript, GraphQL

Warehouse Logistics System

Desktop, Web API and Mobile logistics management apps for DSV (Sweden). Technologies: C# .NET, SQL, Angular

Construction Plan Editor

Web-based construction plan annotation tool (New Zealand). Technologies: Java, CSS

Minecraft MOD

A custom java Minecraft mod for Youtube content creation org. (USA). Technologies: Java, MinecraftForge

Payroll System

A payroll system/module for an accounting/book keeping app. (New Zealand). Technologies: React, Tanstack, Typescript, PHP, Laravel, Docker

SKILLS

Languages (Programming/Markup): C#, CSS, Dart, HTML, Java, JavaScript, PHP, SQL, TypeScript

Frontend: Angular, Flutter, JavaFX, React, Vue JS

Backend: GraphQL, .NET Framework, NodeJS, PHP Laravel

Mobile: Dart, Flutter

Databases: MySQL, PostgreSQL, SQL Server, Supabase

Tools: ClaudeCode, Cursor, Docker, Git, MinecraftForge, VS Code, WordPress

Concepts: Agile Development, Object-Oriented Programming (OOP), RESTful APIs, UI/UX Design

Additional Information: Excellent communication and collaboration skills, Proficient in AI-assisted development workflows, Strong adaptability to new technologies and frameworks
